

True corrosion resistance for ER applications

STAINLESS STEEL

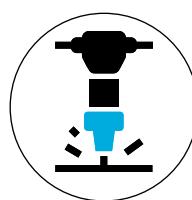

REGO-FIX introduces a large standard range of ER collets made out of stainless steel. Offering a uniform corrosion protection in aggressive environments like sea water, acidic or basic solutions.

CHALLENGING ENVIRONMENTS

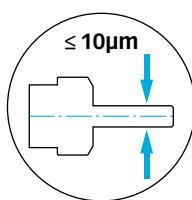

Corrosion can appear in humid environments or in specific applications like EDM machining (Electrical Discharge Machining). A surface treatment or coating (plasma nickel plated) on the ER collet will not offer sufficient protection, thus stainless steel raw material is the long lasting solution.

ER INOX

Ultimate protection thanks to high quality martensitic stainless steel 1.4122 (X39CrMo17-1). Get all the advantages of an ER collet combined with corrosion protection – Made in Switzerland.

Perfect for EDM machining

Precise clamping (TIR)

High quality stainless steel

Available from stock

Corrosion testing

Corrosion testing determines the resistance of materials to corrosion under certain environmental conditions as temperature, humidity and salt water. This examination helps to identify different corrodents and environmental factors responsible for corrosion problems. In the following test, collet raw material steels have been tested under an intensive 360 hours duration test process.

Test duration: **360 hours**

Standard ER Collet
Material: Conventional Spring Steel

Competitor Stainless Steel ER Collet (Germany)
Material: DIN 1.4034

REGO-FIX Stainless Steel ER Collet
Material: DIN 1.4122

ER INOX collets

| Type | Part no. | Ø [mm] | Material | Run-out (Max. TIR) | Clamping range [mm] |
|--------------------------|------------|--------|------------|--------------------|---------------------|
| ER 11-INOX collet | | | | | |
| ER 11-INOX | 1111.01504 | 1.5 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.02004 | 2.0 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.02504 | 2.5 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.03004 | 3.0 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.03184 | 1/8" | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.04004 | 4.0 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.06004 | 6.0 | DIN 1.4122 | ≤ 10 µm | 0.25 |
| ER 11-INOX | 1111.06504 | 6.5 | DIN 1.4122 | ≤ 10 µm | 0.25 |

| Type | Part no. | Ø [mm] | Material | Run-out (Max. TIR) | Clamping range [mm] |
|--------------------------|------------|--------|------------|--------------------|---------------------|
| ER 16-INOX collet | | | | | |
| ER 16-INOX | 1116.03004 | 3.0 | DIN 1.4122 | ≤ 10 µm | 0.50 |
| ER 16-INOX | 1116.04004 | 4.0 | DIN 1.4122 | ≤ 10 µm | 0.50 |
| ER 16-INOX | 1116.06004 | 6.0 | DIN 1.4122 | ≤ 10 µm | 0.50 |
