

# CSW – Cleaning Swabs

Sustainable cleaning even in hard-to-reach areas

## PROPERTIES

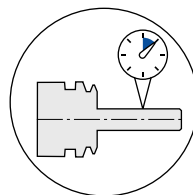

Resilient, soft and non-abrasive. The material protects sensitive surfaces and is suitable for clean environments as it releases hardly any particles.

## ADVANTAGES

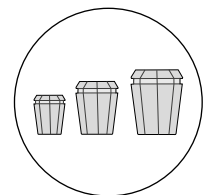

The firm, adhesive-free bond between the foam and the handle ensures high durability. At the same time, the foam protects against scratches in sensitive applications.

## APPLICATIONS

Suitable for the targeted cleaning of mechanical components. Reliably removes residues such as oil, dust or particles without impairing function.

Cleaning for the highest possible precision

A suitable swab for almost every size

Intuitive application

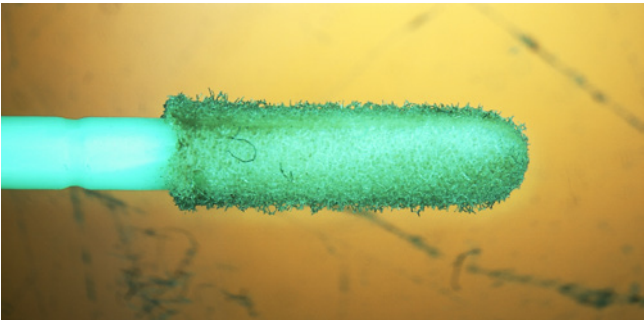

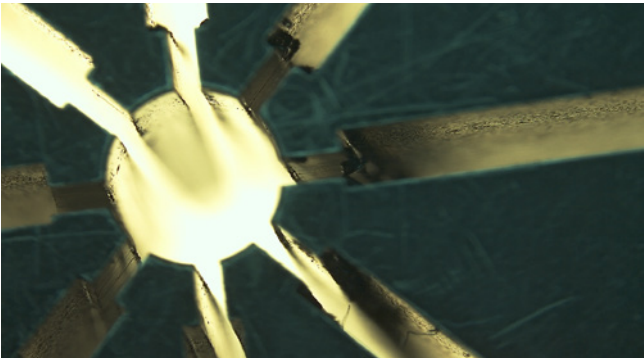

Environmentally friendly, solvent-free

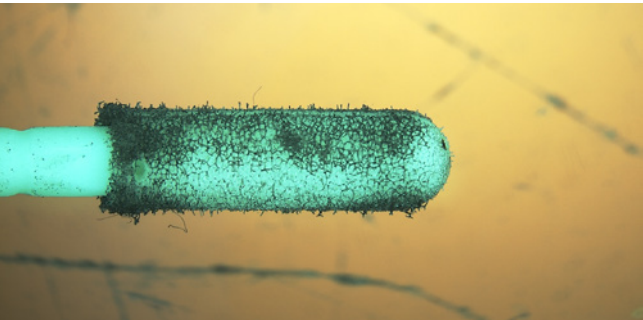

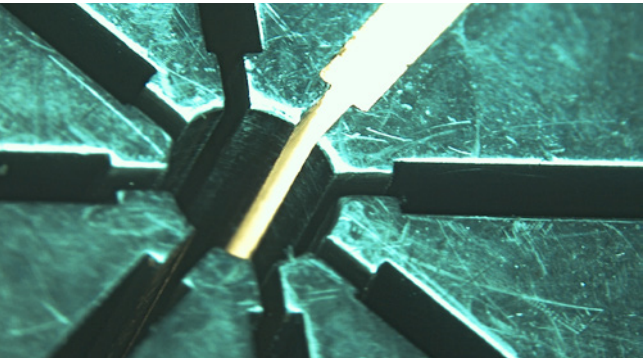

Sustainable and easy cleaning with Cleaning Swabs

The Cleaning Swabs can be used to clean hard-to-reach areas quickly and reliably. Oil, dust and particles are removed without damaging sensitive surfaces or impairing the function of components. Thanks to the different sizes, the swabs can be used specifically for different applications, allowing even the smallest components to be thoroughly cleaned. Intuitive handling enables efficient cleaning without the use of solvents, while also contributing to sustainable use.
